

14 TIPS FOR CHOOSING THE RIGHT WHOLESALE TIRE SOFTWARE

Does your software understand your whole(sale) business?

Most software for the tire industry only focus on retail operations. Sure you can make it work, but what if you were to use software that truly understands your wholesale business?

Software with your type of business in mind will make it easier for you to run your company and manage its profitability.

INVENTORY CONTROL

The inventory needs of wholesalers can be guite different - and more complex - than for pure retailers.

Make sure your software:

1. Includes inventory re-order management

2. Supports multiple bin locations

3. Offers consignment in-and-out tracking

4. Integrates with the leading Warehouse Management Systems

We can help maximize your profits with software designed to make your business more efficient and competitive.

DELIVERIES

Unlike most retail businesses, customer deliveries are a standard function for wholesalers. Managing deliveries requires a number of special capabilities including:

5. Delivery route planning

6. Remote warehouse location printing for customizing packing lists and orders

7. Cash on delivery (COD) tracking

8. Mobile proof of delivery and signature capture

9. Drop-shipping

10. Shipping and container module

MANAGEMENT & SALES TOOLS

Getting the most out of your wholesale business depends a great deal on your ability to easily manage the details within your main business applications.

11. Manage price levels, including markups, discount structures and specials

12. Create and track promotions and manage manufacturer rebates

13. Integrate with B2B websites live, not with batch updates

14. One program can also manage your retail and online sales

Software like GTX from ASA Automotive Systems includes accounting, inventory and sales for businesses of all sizes and types, including wholesale.
