

ASA TireMaster

TireMaster is software that's specifically designed for use by tire and automotive professionals. With TireMaster, you can easily handle transactions that are unique to these industries. You can generate valuable reports about your business, market to your customers, and increase your profitability. Depending on the size of your business, one of these TireMaster products is right for you.

TireMaster Corporate

Designed for businesses with multiple stores, TireMaster Corporate includes all of the functionality available in TireMaster Plus (see below for more details) with the addition of centralized accounting. With TireMaster Corporate, data is transmitted between stores and a corporate site with Sybase® MobiLink™.

TireMaster Plus

Feature-rich point-of-sale and inventory-control modules are at the heart of TireMaster Plus. The accounting component includes a general ledger and the means to track both accounts-payable and accounts-receivable transactions. The Service Checklist and Marketing Module both come standard with every system. These features make it easy for you to drum up repeat business through targeted and mass mailings.

TireMaster Point of Sale

This option is for shops that don't use an integrated accounting system. Point-of-sale, inventory-control, and accounts-receivable modules, along with the Service Checklist, are all standard in TireMaster POS. An interface to the QuickBooks® accounting system is also available for TireMaster POS.

To find out how TireMaster can give you a competitive advantage, call **800-657-6409**, email info@asatire.com, or visit www.asatire.com.
